

# BioGeometry® with CEREZA DESIGN

● **Identify Disturbances** At Cereza Design, I begin each BioGeometry consultation by identifying areas of subtle energetic disturbance. These often stem from technological interference—WiFi, smart meters, electrical wiring—but may also include gridlines known to disrupt biological coherence.

● **Apply Tools.** Using a specifically designed pendulum based on Egyptian energetics, I locate key discordant zones and determine where to apply precision-designed BioGeometry tools—transparent acrylic forms encoded with specific angles and proportions. These tools are discreet yet potent, recalibrating the space to resonate with a rare energetic signature known as BG3.

● **Align Energy.** BG3 is a qualitative energy—an innate balancing field found at sacred sites, in nature’s most coherent systems, and within the human energy field, at peace.

● **The result?** Clients often report improved sleep, reduced tension, heightened clarity—and a felt sense of “peace” in their home they hadn’t noticed was missing.

**BioGeometry invites you to experience your space as a living system of energy, consciousness, and intention. By harmonizing subtle energies, we create environments that nourish your spirit, calm your mind, and restore natural balance in every aspect of life. Complimentary consultation; rate scaled by project.**
